EDUCATION

UNIVERSITY OF BAGUIO

Bachelor of Science in Computer Science

- Best Research and Best Presenter
- Awards: Cum Laude (Final Average: 91.84%)

Baguio City, Philippines

August 2019 – June 2023

UNIVERSITY OF THE CORDILLERAS

Science, Technology, Engineering and Mathematics (STEM)

- Awards: With Honors

Baguio City, Philippines

2017-2019

PROFESSIONAL EXPERIENCE

YNS PHILIPPINES, INC.

Makati City, Metro Manila, Philippines

Software Engineer

February 2025 – Present

- Collaborated within an agile team to **design, build, and optimize** enterprise-grade microservices and core modules.
- Designed and implemented full-stack features using **Laravel, Vue.js, JavaScript, Python, MySQL, Node.js, and Docker**.
- Managed staging and test environment deployments using **AWS EC2 and Docker**, supporting QA and client UAT testing.
- **Configured and maintained Linux-based EC2 environments**, including application setup, deployment validation, and database connectivity.
- **Git branch management**, merge requests, and workflow improvements that reduced deployment issues.
- Developed and maintained automated test suites using **Pest 4, PHPUnit, and Robot Framework**.
- Performed **debugging, root-cause analysis, query optimization, and production issue resolution** for critical workflows.
- Collaborated on **release activities** and **deployment troubleshooting** to ensure stable application delivery.
- Conducted **code reviews and peer feedback** to maintain high code quality and consistency with standards.
- **Optimized backend processes and database queries** to improve system responsiveness and operational efficiency.
- Contributed to **cross-team knowledge sharing** and **technical documentation** to support deployment readiness and continuous improvement initiatives.
- Worked with **Drone CI** in deployment workflows and explored **GitHub Actions** for CI/CD automation and testing pipelines.

Junior Software Engineer

December 2023 – January 2025

- Contributed to the enhancement of enterprise modules covering contracts, route planning, scheduling, emissions tracking, and site operations.
- Gained strong hands-on experience with **Postman** and **API testing (REST APIs)** for validating endpoints and ensuring integration reliability.
- Maintained automated test suites (PHPUnit, Pest) and implemented CI/CD-friendly test processes.
- Assisted in refactoring codebases and optimizing queries, reducing bottlenecks and improving performance.
- Supported release activities and participated in sprint planning, retrospectives, and daily stand-ups.
- Conducted **knowledge-sharing sessions** within the team, mentoring peers and promoting best practices in development and testing.
- Collaborated with teammates and senior developers to align solutions with business requirements.

- Developed a microblog application during onboarding, gaining hands-on experience with **Laravel, Vue, Docker, Git (Bitbucket), and Ubuntu**.
- Contributed to the **foundation of a new enterprise project**, assisting peer developers with authentication and other core features to establish a solid baseline for further development
- Participated in **Scrum ceremonies** (daily stand-ups, sprint planning, retrospectives) and joined **company-wide knowledge-sharing sessions** to accelerate learning and align with best practices.

COMMISSION ON HIGHER EDUCATION (CHED-CAR)

La Trinidad, Benguet, Philippines

Software Developer Intern

January 2023 – May 2023

- Developed a web app for tracking employee leave and managing file documentation, boosting efficiency and transparency.
- Maintained and debugged a scholarship system to ensure secure and reliable operations.
- Supported network administration and resolved IT issues to maintain system stability.

SKILLS

Technical/Programming:	PHP (Laravel), Python, JavaScript (Vue.js, React.js, JQuery, Ajax), Java, Kotlin, Ruby, SQL, MySQL, Node.js (Express), TypeScript, RESTful APIs, and automated testing (PHPUnit, Pest4, Robot Framework), CI/CD (Github Actions, Bitbucket pipelines), API, Rest API, WebRTC, AWS services (EC2, Lambda, s3 Bucket)
Software Development:	Object-Oriented Programming (OOP), Writes clean, efficient, and well-documented code following DRY & SOLID principles, SDLC, agile methodology (Scrum, sprint planning, daily stand-ups)
AI & Code Evaluation:	Utilization of AI tools such as Cursor AI, Blackbox; excellent with debugging, evaluating, and optimizing logic
Tools & DevOps:	Git, Docker, Redis, Sail, Postman. Version control, containerization, caching.
Problem Solving:	Adept at diagnosing complex issues, improving performance, and ensuring scalable, maintainable code

RESEARCH, PUBLICATIONS AND PROJECTS

Thesis*UB Telecare System*

January 2022 – December 2022

- Lead Developer and Project Manager
- Telemedicine system with multiple user roles and video call functionalities
- Developed with PHP (Laravel Framework), MySQL, Ajax and VueJs, Integrated WebRTC API for Video Calls
- Best Research in the 15th SIT Research Presentation

Projects*CHED HR*

January 2023 – May 2023

- CHED employee profiling system for users to view personal files and processes for filing leave applications
- Developed with PHP (Laravel Framework), MySQL, Ajax and VueJs

Succulent Alpha Order Management System (SAOMS)

January 2021 – December 2021

- E-commerce system of selling and buying succulent products
- Developed with PHP (Laravel Framework), and MySQL

SEMINARS, WORKSHOPS AND CERTIFICATES

Knowledge Sharing: Cursor AI (Speaker/Sharer via Zoom Conference)	June 5, 2025
AWSome Day Online Conference (AWS via Zoom Conference)	April 30, 2025
Knowledge Sharing: REST API and Postman (Speaker - Zoom Conference)	June 26, 2024
Tech Trends: Cloud Computing (Intermediate Session - DICT and AWS)	February 23, 2023
Tech Trends: Cyber Security (Intermediate Session - DICT)	February 16, 2023
Google DevFest Baguio 2022 (University of the Cordilleras)	November 12, 2022
Google I/O Extended 2022: Web Edition BCDxBGOxCDO (Baguio)	July 30, 2022
